3. The following is an examiner's statement of reasons for allowance:

The invention as claimed, specifically in combination with a method and system for automatically focusing for imaging, by modulating first light collected from an object to produce a first light signal having a modulation frequency that is a function of a velocity of the object, modulating second light collected from an object, the second light traveling a greater distance before being modulated compared to the first light, to produce a second light signal having a modulation frequency that is a function of a velocity of the object, producing first and second signals from the intensity of the first and second light signals, respectively, and processing the first and second light signal to determine a focal point of the system, and adjusting the focus on the object, is not disclosed or made obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
